Lower Your Electric Bill In A Few Simple Ways

As the temperatures rise in the next few months, so will your electric bill. You may rely on fans and air conditioning to keep cool at home. There are a few things you can do before you turn on your tower fan! First, you should keep your home's blinds and curtains shut so that you don't allow heat to freely enter your home. Additionally, you should always wear season-appropriate attire or take a cool shower whenever you need to cool off.

We're now *mobile.*

Have you gone mobile? Download our mobile app today to transfer funds, deposit checks, and bank on the go with us. We'll always be here for you, even when you're out of town!

6 Easy Ways to Save Money This Season

Summertime means barbecues, family vacations, and long pool days. Stay on budget this summer with these simple tips to avoid overspending and sacrificing any fun.

1. Have a garage sale. Do you have unwanted items at home that are just cluttering your space? A garage sale is the way to go! Reach out to neighbors, maybe they want to join in as well.
2. Skip the car wash and wash your car at home. Make it a family event and have everyone outside helping out!
3. Clean out your closet and sell old clothes. Take advantage of the several online marketplaces available to sell clothing. You also could sell them at your garage sale!
4. Pack your lunch. This may also encourage you to eat healthier as well! It's a win-win.
5. Keep your blinds and curtains closed during the day. This will allow your house to stay cool during those hot summer days.
6. Take advantage of free events around your community. Maybe there is a park that you haven't gone to yet that is hosting a free outdoor movie night. Go check it out!
